                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Leading % causes rpcgen to pass a line directly thought to the output, ie edmlink_sunrpc.h in this case. This allows the .h to make a little more sense and be properly documented.
